

# RELEASE NOTE

New Features

## **v1.1.47**

- Switch PoE scheduling feature will let user configure schedule via Cloud GUI when the device is powered by PoE of the port.
- Switch LED on/off feature allows switch LED to be turned off at the upper-right corner in switch device detail page via Cloud GUI. (please be advised PoE Mode/LAN Mode LED cannot be turned off due to hardware limitation.)
- Reset PoE from the port panel allows user to mouse-over PoE ports on switch port panel via Cloud GUI and power-cycle the port so the device attached to the port can be rebooted.
