

Fit Solution Brochure

Flexible and Smart Network Solution

EnGenius Fit helps you deploy devices to integrate with an existing on-site network or remotely manage networks on the go. Businesses can easily access the Fit platform to configure, monitor, and manage networks through the appliance, web interface, or mobile app.

An Innovative Total Solution for Your Business

Device Configuration

WLAN configuration and group settings for APs and switches

Network Management

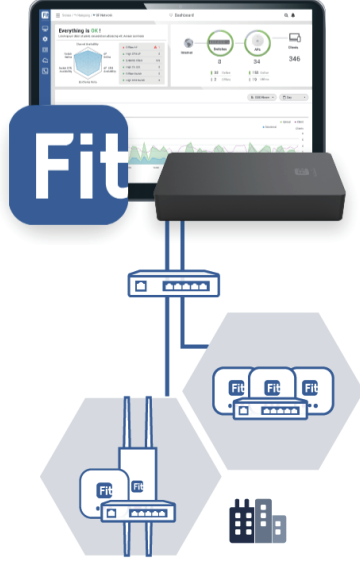

Multi-tenant system maintenance and real-time event notification

Visualized Monitoring

Monitor and provide visualizations for devices status

Network Management for Various Business Scenarios

	Local	Remote Management	On-Premises Management
	 <p>SOHO</p>	 <p>SMALL BUSINESS</p>	 <p>SMALL BUSINESS</p>
Management Platform	Device GUI	FitXpress	FitController
Number of devices	≤ 5 devices	≤ 30 devices	≤ 100 devices
Target customer	SOHO, Independent store	Chain stores, Branch offices	Headquarter, Campus, Small business

Wi-Fi 6

Next-Generation Wi-Fi Featuring Higher Capacity, Greater Efficiency, and Improved Performance

The Game Changing Product - 11ax Access Points

802.11ax (Wi-Fi 6) technology improves upon real-world deployment of 802.11ac. As the next-generation Wi-Fi, 802.11ax brings speed improvements along with greater stability and efficiency in wireless connections.

Innovative Features of Wi-Fi 6

<p>Greater Capacity Serves more devices simultaneously</p> <ul style="list-style-type: none"> 8x8 MU-MIMO Increases capacity up to 4x OFDMA Enables more clients to transmit simultaneously BSS Coloring Allows access points be placed closer together 	<p>Higher Efficiency Handles simultaneous connections without slowdown</p> <ul style="list-style-type: none"> OFDMA Reduces payload and latency BSS Coloring Reuses the channel and improves interference Target Wake Time Saves the battery life of devices 	<p>Improved Performance Increases throughput with new modulation scheme</p> <ul style="list-style-type: none"> 8x8 MU-MIMO Receives data from multiple antennas, doubling bandwidth 1024QAM Increases data rates by 25% Target Wake Time Reduces the latency from contention of clients
---	--	---

Scenarios Where 802.11ax Can Boost Your Wi-Fi Performance

Heavy Interference

Environment : Office, enterprise environments

802.11ax's spatial reuse feature, through BSS coloring, reduces co-channel interference and improves simultaneous transmissions. This cuts through RF congestion in office environments for greater network efficiency.

Dense Usage

Environment : Stations, libraries, and shopping malls

802.11ax's uplink and downlink of MU-MIMO provides greater network efficiency and focuses radio energy on specific users. Capable of handling demand-heavy environments with many client devices, such as airports, gas stations, libraries, and shopping malls.

5G Complement

Environment : Indoor Spaces

EnGenius Wi-Fi 6 and 5G can provide more smart applications with higher data rates and increased capacity. Wi-Fi 6 is ideal for indoor or high-density areas, while 5G is optimized for outdoor mobile communications.

EnGenius Fit Wi-Fi 6 Access Points

Wi-Fi 6 (11ax)	Indoor AP			Outdoor AP
				
Access Points	Fit6 2x2	Fit6 4x4	Fit6 2x2 Lite	Fit6 2x2 Outdoor
Wi-Fi Standard	802.11ax	802.11ax	802.11ax	802.11ax
2.4GHz Speed	574 Mbps	1,148 Mbps	574 Mbps	574 Mbps
5GHz Speed	1,200 Mbps	2,400 Mbps	1,200 Mbps	1,200 Mbps
PoE Standard	802.3af/at	802.3at	802.3af	802.3af/at

Business Mesh

A Smarter Way to True Wireless

Optimized Mesh Technology Brings You Wi-Fi without Dead Spots

Place EnGenius Mesh devices where you need coverage and let EnGenius Mesh technology automatically connect them to your network.

Extend Wi-Fi coverage without cabling hassles
Provides all-encompassing coverage in your home or office without any cables required.

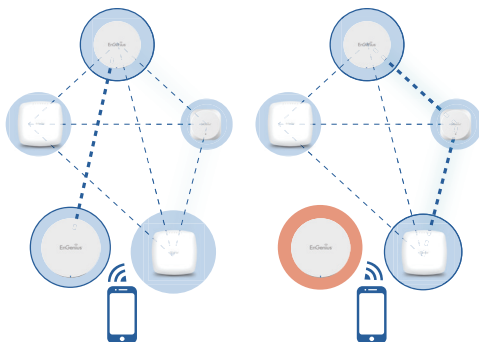

Smart webbing by Enterprise-grade Mesh

The network automatically links up the nodes to the existing structure without needing manual adjustments.

Smart healing when a wireless link is lost
Recalculate link quality to find the best path whenever a node loses connection.

Smart routing for consistently high quality

Constantly optimize path selection on each device using enterprise-grade mesh algorithms.

Industrial Case Studies of Mesh Technology

Warehouse/Industrial Areas

Challenges

- Insufficient cabling connections.
- Wireless signals are blocked by moving obstacles.

EnGenius Mesh solution

- Mesh APs are flexible to deploy with wall, ceiling, and pole mount options.
- Fewer wiring constraints makes it easy to place access points based on desired coverage area with minimal environmental modification.

Hospitality & Heritage

Challenges

- Installation without remodeling existing structures or disrupting business.
- Off-the-grid locations are difficult for high-speed internet service providers.

EnGenius Mesh solution

- Mesh access points can be powered by DC Input or PoE on existing power sources.
- High flexibility of network deployment with mesh nodes that can be easily added or removed.

Concerts Fairs, and Gatherings

Challenges

- Significant coverage and capacity requirements of internet connectivity.
- Flexible deployment for different activities requirements.

EnGenius Mesh solution

- Network deployment for more than 1,000 devices across large areas remotely.
- Mesh technology enables flexible and mobile deployment.

Flexible and Smart Management Planes

Empower Local or Remote Management

Experience the Unprecedented Convenience of Management

EnGenius Fit offers various network management platforms, including FitController and FitXpress, which make businesses easy to monitor, manage, and troubleshoot for both remote and on-premises networks.

Flexible and Smart Management Planes

Remote Managing On-the-go EnGenius FitXpress	On-Premises Networking EnGenius FitController
	
<p>Web or mobile app allows businesses to easily and remotely manage distributed network devices.</p>	<p>Simplified deployment and port management for expandable business.</p>
<ul style="list-style-type: none"> • Manage on-the-go • Easy to use • Multi-location networking • Capable Up to 30 devices/sites 	<ul style="list-style-type: none"> • On-premise deployment • Plug & Play • Built-in enterprise-level features • Capable Up to 100 devices/sites

Super easy network management via mobile app or web

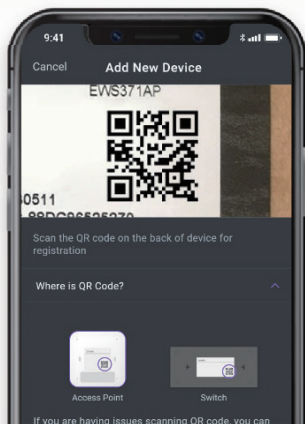

Outstanding Features for Managing Network On-the-Go

FitXpress is a mobile app for simple configuration and management for EnGenius network devices. Users can quickly get devices on board and monitor the deployed devices on their smartphones or tablets.

Rapidly Deploy From Anywhere

Deploy smarter by scanning with mobile to get each device onboard in seconds. With just a few clicks of initiating setup, your devices will be auto-provisioning.

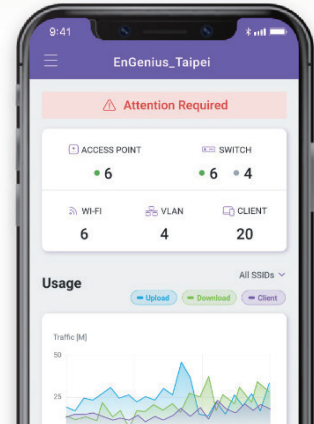

Initiate A Wi-Fi In Minutes

Setup Wi-Fi networks easily with the predefined and custom profiles through a straightforward interface. Separate the Wi-Fi for staff and guest for security.

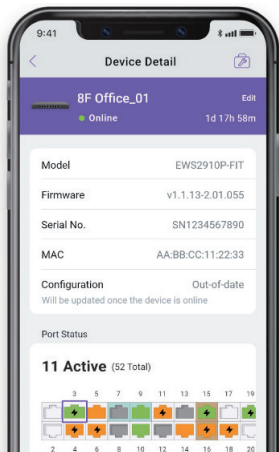

Network Health in Dashboard

Grasp the real-time and comprehensive information of your networks and get alerted when problem occurred.

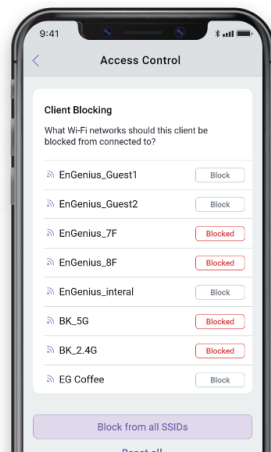

Monitor with in-depth Info.

Have clear views of Access Points, Switches, and connected clients to check abnormal network behavior or troubleshoot.

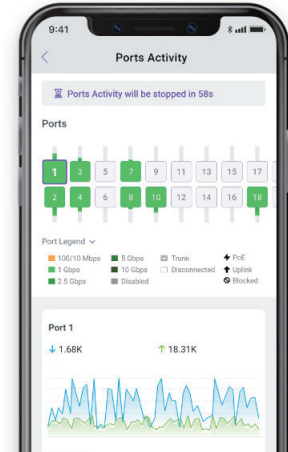

Access Control and Blocking

Control the accessibility of Wi-Fi networks and block the suspicious client to access your Wi-Fi from the client list.

Handy Troubleshooting Tools

A bunch of visualized diagnostic tools is in place whenever a device is found problematic.

Keep Autonomy and Data Privacy

All control packets are encrypted through the secure tunnel connection between FitController and managed devices, allowing businesses to use these features securely while maintaining autonomy and data privacy.

Group Settings for Multiple Device

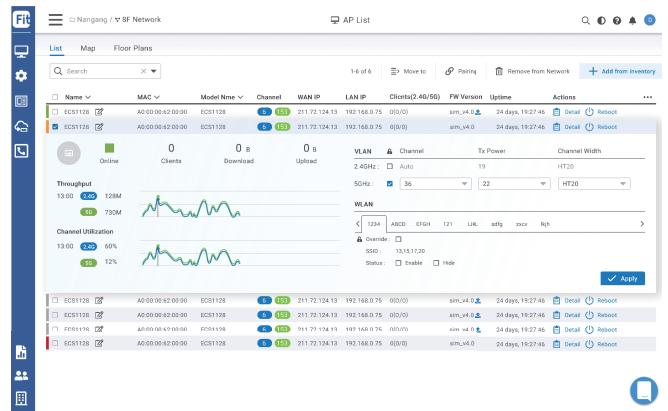

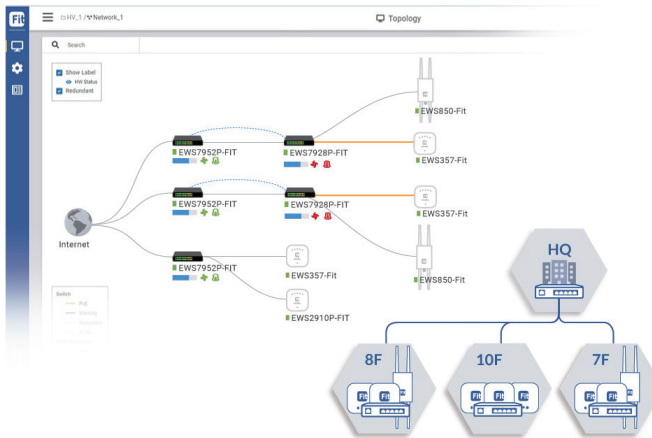

FitController prompts users to provide group configuration for the following parameters of devices: SSID based WLAN Settings, mesh settings, and wireless radio settings.

Topology View

Show the relationships of all deployed devices. Check the status of switch ports and the information of connected client number, IP address, and wireless operating channels.

Device List with Details

Check the device list and drill down to discover potential problem areas with switches, access points, or client devices.

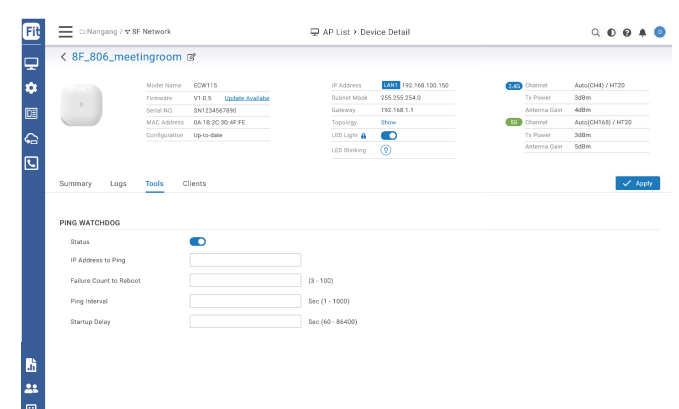

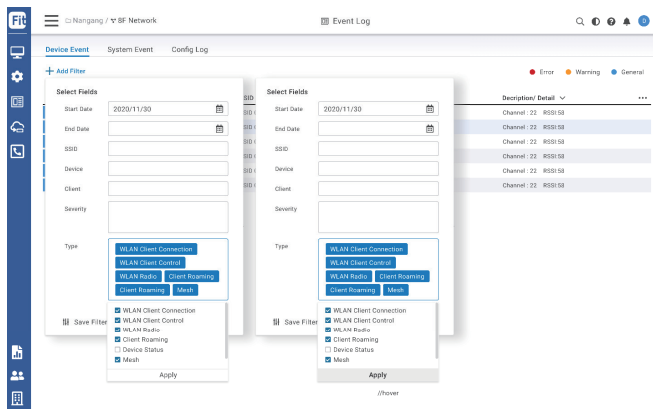

Event Monitoring and Notification

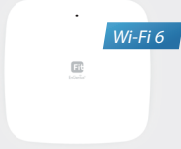

Apply filters of management strategies on events of particular concern. Monitoring can be linked to the system's email server to notify managers of events of interest via their inbox.

Diagnosis and Troubleshooting

Run the diagnostic tests with intuitive interface to find potential issues and adjust device settings to improve user experience and network performance.
