## **NAP102**

### 802.11ac Dual-Radio Nebula Cloud Managed Access Point

The Zyxel Nebula NAP102 802.11ac Dual-Radio Nebula Cloud Managed Access Point is a high-performance, cloud-managed 2x2 MIMO 802.11ac AP designed for deployments in offices, schools, hospitals, hotels and retail stores. With ultra-fast speeds of up to 1.2 Gbps, the Nebula NAP102 has revolutionized cloud managed wireless networking to a higher entry level. Featuring dual-concurrent, dual-band operation and advanced technologies such as Dynamic Channel Selection, Load Balancing and Smart Client Steering, the NAP102 delivers high throughput and reliable coverage for a superb Wi-Fi experience.

Every Nebula AP has been engineered for cloud management. Based on the NETCONF standard, all data traffics between the cloud and access points are exchanged using secure transports to ensure transaction-safe configuration on all Nebula devices. Furthermore, with the intuitive management interface, administrators are able to manage all the access points quickly even without training.

#### **Benefits**

#### **Zero-touch deployments**

The Zyxel Nebula NAP102 auto-configures itself after installation and then automatically connects to the Nebula cloud to join the network; so auto-configuration, provision, monitoring and diagnostics can be performed anytime, anywhere. This simplifies network setup and enables deployment of Nebula APs to a remotely located network even by non-IT professionals.

Cloud-managed, dual-radio 2x2 MIMO 802.11ac access point

Supports combined data rates of up to 1200 Mbps

Self-configuration and zerotouch deployment

Enterprise-class security and RF optimization

Dynamic Channel Selection, Load Balancing and Smart Client Steering

#### Optimized wireless experience

The Zyxel Nebula NAP102 delivers optimized wireless experience for users with comprehensive wireless features such as Dynamic Channel Selection (DCS), Load Balancing, and Smart Client Steering, etc. DCS avoids interference from co-channeling and overlapping channels continuously, while Load Balancing and Smart Client Steering which features Band Select and Balance for more spectrum to provide more stable, reliable wireless connections.

#### Smoke detector design that blends into environments

Different from traditional business access points, the Zyxel Nebula NAP102 comes in a "smoke detector" ceiling-mount design. Since the "smoke detector" design is not invasive, there is no need to hide it behind the ceiling tiles; and the ceilingmount optimized RF design can provide its best performance and coverage. In addition, the NAP102 is plenum-rated and made of non-toxic materials without hazardous emission – critical for public indoor wireless deployments.

#### **Enterprise-class security**

The Zyxel Nebula NAP102 inherits the NETCONF protocol for secure configuration changes. In terms of authentication and data encryption, it supports WPA2 enterprise protection and a wide range of Extensible Authentication Protocol (EAP) types, including EAP SIM for smartphones. Besides, the NAP102 also features access control and Layer-2 isolation for privacy protection. The comprehensive security features ensure NAP102 to deliver enterprise-grade protection to the entire network.

#### **Ultra-fast speed**

The Zyxel Nebula NAP102 is a 2x2 802.11ac AP that provides Gigabit Wi-Fi experience. The concurrent dual-band support meets the pervasive BYOD demands to support more clients with equal signal coverage in both 2.4 GHz and 5 GHz bands.

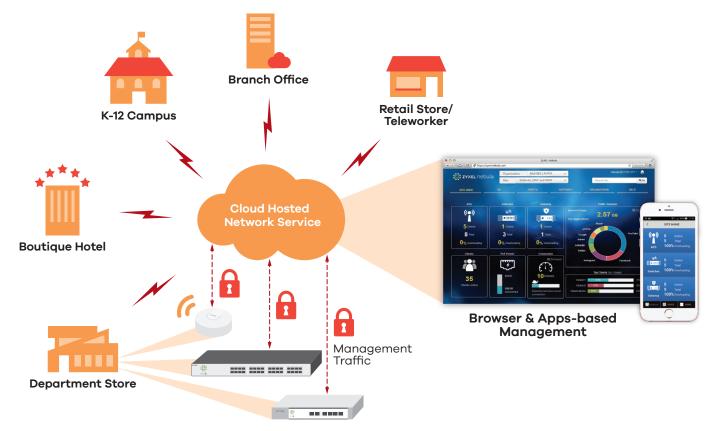

Real-time control of all the devices through a single pane of glass

Monitor AP usage and client report by different time intervals and view historical status record via the intuitive management interface

### **Weather-Proof Mounting Option**

#### **Outdoor Enclosure**

People like to enjoy the combination of great view, fresh air and Wi-Fi service when they're outdoors. This weather-resistant enclosure brings the Zyxel indoor AP outdoors to make deployments in places such as parks, campus, poolside or camping yard convenient and affordable. This enclosure allows the AP to be easily mounted on any wall or pole. The durable enclosure is designed to withstand a wide range of temperature from 50°C to -20°C, waterproof the APs with IPX5 rating certified and extend lifespan with the UV stabilized plastic, which makes it the most reliable weatherproof enclosure.

#### **Features**

- Compatible with various APs including unified, cloudmanaged and standalone units
- Wide operating temperature range from 50°C to -20°C
- Compact size easily blends into any environment seamlessly
- UV stabilized plastic extends enclosure lifetime
- Flexible mount design for wall mount, or pole mount installation with pole mount kit (sold separately)
- IPX5 rating makes Zyxel indoor AP weatherproof

### **Specifications**

Model	Enclosure
Dimensions (WxDxH)(mm/in.)	238.54 x 249.72 x 86.97/9.39 x 9.83 x 3.42
Weight (kg/lb.)	0.64/1.4
Mounting options	Wall, Pole (pole mount kit is sold separately)
Certified	IPX5
Adjustability	Swivel +/-40° Tilt +/-15°

#### **Compatibility List**

- NWA1123-ACv2
- NWA5121-N
- NWA5121-NI
- NWA5123-AC
- NAP102

- NWA1123-AC PRO
- WAC6103D-I
- NAP203
